

NEWS RELEASE

TSX-V: WCB

August 20, 2010

WCB Resources Ltd. Releases Maroon Mountain Results

WCB Resources Ltd. ("WCB") (WCB - TSX.V) has released results the first round of drilling and channel sampling on the Bear Vein System situated on its 1059 hectare Maroon Property that is located 35 km north of Terrace, BC. The program included 600 meters of drilling, 20.7 meters of channel sampling and 10 grab samples. The program concentrated on the mineralization on the north flank of Maroon Mountain known as the Bear Vein.

WCB Resources Ltd identified the Maroon District as having potential for the development of a high grade bonanza vein system within which individual high grade ore shoots can be targeted. This was suggested on the basis of previous exploration results which included individual high grade results.

A total of six (6) NQ diamond-drill holes were completed from three drill pads this summer. This puts the total number of holes drilled on the property to eight (8) when including the two (2) previous 2002 drill holes. Drilling has taken place along a total strike length of 323 metres of the Bear Vein System.

Highlights from this year's drilling include intersections of 0.3 meters averaging 18.9 g/t gold, 0.44 meters averaging 5.9 g/t gold, and 0.43 meters averaging 5.9 g/t gold. See Table 1 below for a summary of drill results.

Table 1: Summary of 2010 + 2002 drill programs

HOLE	DEPTH FROM	DEPTH TO	METRES	Au-g/t	Ag-g/t	Cu-%	PB %	Zn %
WCB-01	25.42	25.72	0.30	18.9	117	0.29	6.20	3.89
WCB-02	35.32	35.76	0.44	5.7	51.1	0.24	1.85	4.10
WCB-06	43.77	44.20	0.43	5.9	56.1	0.20	3.00	8.60
DDH-1 (2002)	69.67	70.30	0.63	26.1	32.6	0.21	1.62	2.97

Nine trenches were channel sampled across the vein at surface for a total of 20.7 meters along a total strike length of 294 meters. See Table 2 below for a summary of results.

Table 2: Summary of 2010 trench and channel sampling

TRENCH NAME	SAMPLE LENGTH	Au g/t	Ag g/t	Cu %	Pb %	Zn %
WCB-T3	0.15m	12.2	42.9	196	0.40	0.11
WCB-T7	0.85m	18.5	31.8	310	0.27	0.19
WCB-T9	0.85m	14.8	114	1760	6.90	2.36
WCB-T9	0.65m	1.9	19.15	495	0.35	0.19
WCB-T8	0.60m	0.7	292	538	15.7	1.40
WCB-T6	1.0m	1.8	2.19	327	0.08	0.24
WCB-T6	1.0m	1.2	6.75	167.5	0.18	0.14

A total of 10 grab samples were taken from various sites along the property in order to repeat historical findings. Sample sites range from the tailings dumps of historical adits driven into the vein at

depth to vein material seen at surface in outcrop. The strike length between samples listed below is 260 meters. These results reflect the original high grade bonanza vein target concept.

Table 3: Summary of 2010 rock sampling

SAMPLE NUMBER	Au g/t	Ag g/t	Cu %	Pb %	Zn %
I128003	42.9	190	0.17	8.50	5.69
I128004	8.5	24.3	0.12	0.83	3.70
I128005	100	49.7	0.03	0.33	0.05
I128006	192	347	0.01	5.50	0.02
I128007	69.1	93.1	0.16	4.27	7.96
I128008	66.9	93	0.08	4.68	3.78

Due to time constraints, the Company only drilled a small portion of the strike length. The encouraging results from this season suggest that a large scale geochemical soil survey should be undertaken on the entire property to further delineate drill targets. The Company is currently evaluating whether or not sufficient time remains the 2010 season or if this will be completed in 2011.

About WCB Resources

WCB Resources is a minerals exploration and development company that brings together a strong, interdisciplinary, and proven management team with the ability to take a project from discovery right through to operation. The Company was listed in April 2010.

WCB's strategy is to build shareholder value through acquisition, exploration and development of copper gold projects. This strategy is being developed by a synthesis of WCB's core skills in project evaluation, structured acquisition, exploration and project development and operations, areas where WCB directors and executives have significant experience.

We believe that our capabilities and experience, combined with an efficient corporate structure, provide tremendous potential upside for investors. WCB Resources is engaged in an ongoing search and evaluation of additional copper gold projects in various regions around the world.

Mr. Cameron Switzer, BSc (Hons), MAIG MAUSIMM, President and Chief Executive Officer of WCB Resources, is a qualified person as defined by National Instrument 43-101. He will be responsible for quality control of exploration undertaken by WCB. Mr. Switzer has reviewed and approved the technical information in this release.

On behalf of the Board of Directors

Cameron Switzer
President and Chief Executive Officer
WCB Resources Ltd.
