Recent Price	C\$0.35

Summary

- Focussed in a World Class Mineral Belt on the Misima Island Tier 1 Exploration Asset
- Brownfield's Exploration (past production of 4.0Moz Au and 20Moz Ag)
- Untested drill ready high order Porphyry Cu Au Ag Prospect confirmed (Misima Porphyry)
- Resource of 1.57Moz Au 8.5Moz Ag defined (Umuna)
- Additional porphyry Mo Au Cu system recognised (Quartz Mountain)
- Supportive Farm In Partner - Pan Pacific Copper
- Major shareholder - Sandfire Resources NL

Misima Island Project

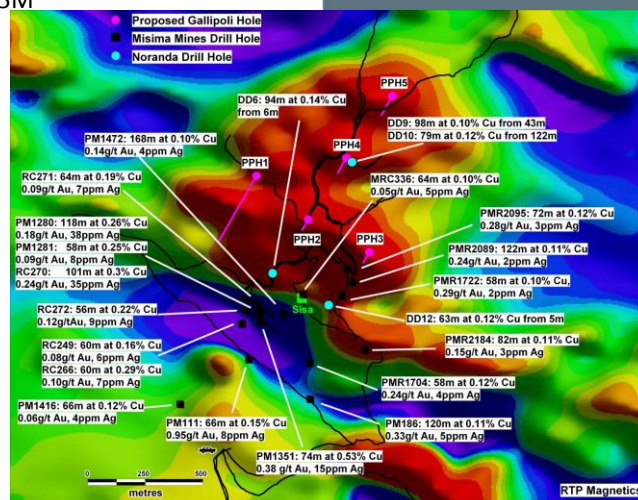

- WCB can earn 70% in the Misima Island Project via the staged expenditure of \$9.0M over a 4 year period. WCB currently owns 30% of the project. The Farm In partner is Pan Pacific Copper, a global integrated copper mining and smelting company owned jointly by JX Nippon Mining and Metals Corporation and Mitsui Mining and Smelting Company Ltd.
- Misima, Island is located in Papua New Guinea, previously produced 4.0M oz's of Au and 20M oz's of Ag between 1989 and 2004. Mining ceased production when metal prices were at historic lows (average life of mine realised price Au \$376oz, Ag \$5oz).

SandFire Resources

- Invested in April 2014
- 38% shareholder
- Large ASX listed copper producer with a market cap of approx.A\$875M

Current Drill Program (Misima Porphyry)

- Quest Exploration Drilling appointed drill contractor (August 2014)
- Drilling commencing on the Misima Porphyry target early September 2014
- Initial program upwards of an estimated +4,000m of diamond drilling
- Projected depths of holes up to +1,000m

Prospect 1 - Misima Porphyry Cu Au Ag

- Defined by large high order Cu Au Ag soil anomaly
- Coincident underlying magnetic high defined at depth
- Significant channel sampling results including 171m @ 0.36% Cu, 0.33 g/t Au and 10 g/t Ag. Results define an area greater than 800m by 500m averaging 0.2 g/t Au and 0.1% Cu
- Average surface grade 0.34 g/t Au, 850ppm Cu, 3.1 g/t Ag over an area measuring 800m by 500m
- Mapping defines well developed fracturing and veining
- Alteration dominated by illite-chlorite-carbonate with minor albite-actinolite-chlorite-carbonate (Outer Propylitic to Inner Propylitic). Gold and copper grade increases with higher temperature alteration as expected

Prospect 2 - Umuna Au Ag Zone

- Large disseminated base metal carbonate gold deposit. Mineralisation associated with fractures, breccias, stockworks, veins disseminations and replacements
- Historic production of 4Moz Au and 50Moz Ag
- Current NI43-101 compliant resource of 43Mt @ 1.10g/t Au and 6.1g/t Ag for 1.57Moz Au and 8.5Moz Ag
- Simple metallurgy, good recoveries for sulphide/fresh of 89%
- System open along strike and at depth, multiple structures

Prospect 3 - Quartz Mountain

- Large Au Mo Pb Zn Ag soil anomaly with minor Cu
- Three small open pits extracted 250Koz Au to shallow depth
- Mineralisation associated with hydrothermal breccia's
- Large annular magnetic high at depth suggesting magnetite alteration
- Recently recognised additional hydrothermal breccia
- Alteration is sericite - albite - chlorite - leucoxene – carbonate
- Geochemistry, geology and magnetic character suggest that Quartz Mountain may represent the upper levels of a porphyry Mo Au Cu system. High priority target for 2014.

Company

WCB Resources is a minerals exploration and development company that brings together a strong, interdisciplinary, and proven management team with the ability to take a project from discovery right through to operation.

WCB currently is focussed on its Misima Island Farm-In project in Papua New Guinea. This is the company's focus as it is clearly a Tier 1 Exploration asset with significant targets in terms of porphyry Cu Au Ag mineralisation in addition to the demonstrated Au Ag potential.

The Company was listed in April 2010 and will focus on the acquisition, exploration, and development of copper gold projects.

Executive Team / Board of Directors

Cameron Switzer	President & CEO & Director
Duncan Cornish	CFO & Director
Shaun Maskerine	Corporate Secretary & Director
Jim Simpson	Director
Peter Lynch	Director
Ross Logan	Exploration Manager
Charles Yobone	Project Manager
